In nature we find some of the most intense and vibrant colours, exotic shapes that dazzle the eye, and extraordinary adaptation to habitat. In many of our CCC butterflies and dragonflies, you can see these wonders of nature in all their variety, and they're favourites with teachers, brides, and anyone who wants to include some of their charm and beauty in decor, scrapbooking, crafts and so many other uses.

But sometimes what's needed just can't be found in nature. That's where fantasy designs can be perfect for your needs. Some examples:

- Heart-themed red butterflies for Valentine's Day or to embellish a scrapbook page about a romantic event.
- Rainbow-colour ladybugs, just for fun, or to make a subtle statement.
- Flower-lovers' butterflies with roses on their wings.
- Patriotic "Stars and Stripes" butterflies, for our American friends' July 4, or welcome-home celebrations for returning service personnel.
