---

Teenager Keisha is wild about butterflies. She has decorated her room with them, written school papers about them, and as she starts to plan for her high school Prom, of course butterflies will be part of her look.

We had an email from Keisha the other day, describing what she has planned for a pretty bracelet / wrist corsage. Her design is based on a band made from pale pink organza ribbon, with some of the butterflies from the pack of 25 that she ordered attached to give the look of a lovely natural cloud around her wrist. She has promised to send a picture of the finished design when it's finished, and we'll be sure to post it here!
