---

Scrapbooking has such a fast growing craft industry and everyone is getting into it. We have designed our products with scrapbooking very much in our minds, taking sizing and colouring into account.

This page was sent in by one of our users after her daughters birthday party. A mix of butterfly designs were used, as you can see they enhance the pages they dont overpower the photos. You can use mix or same style for each of your projects. Be creative these 3D Critters can be used [for every occasion](#) .
